THALVORIX - WEB3 GAME ECOSYSTEM

Thalvorix (THX) Whitepaper

Version 1.0 - November 11, 2026

Executive Summary

Thalvorix (THX) is the ecosystem token of the Thalvorix game on BNB Smart Chain (BSC). THX is used for in-game rewards, community campaign rewards, and - in a later phase - as an in-game currency and a means of governance.

The THX contract has already been deployed and verified on BscScan, with a fixed total supply of **1,000,000,000 THX**. This document explains the tokenomics, the presale, the burn mechanism, and the plan to lock liquidity for 1 year, so that every prospective buyer can check the numbers and terms before taking part.

Presale: normal price 1 BNB = 1,000,000 THX. Hero NFT holders receive an 80% discount - 1 BNB = 5,000,000 THX, max 50,000 THX per Hero NFT held. Liquidity on PancakeSwap is locked for 1 year (365 days). Unsold presale THX is burned.

Key Facts	Details
Name / Symbol	Thalvorix / THX
Network	BNB Smart Chain (BSC, chain 56)
THX Contract Address	`0x4fCdA9835B50BDF454BA96a813d564Ad3060c540`
Total Supply	1,000,000,000 THX (18 decimals)
Hero NFT	`0x6D862c8B847323961FCD349ffFbee0133F6B929A`
Website	https://thalvorix.xyz

1. About Thalvorix

Thalvorix is a Web3 game ecosystem built on BNB Smart Chain. Players own Hero NFTs, battle in Duel Arena Battle Card, collect Mystery Boxes from victories, and exchange Mystery Boxes through the Burn Box feature for THX rewards.

Components already live include the Hero NFT collection with a maximum supply of 6,666, the Duel Arena Battle Card game, Mystery Box, Burn Box, and the community campaign on Zealy. The THX token connects all of these components in one shared reward economy.

2. The THX Token

Specification	Details
Token Name	Thalvorix
Symbol	THX
Network	BNB Smart Chain (BSC, chain 56)
Contract Address	`0x4fCdA9835B50BDF454BA96a813d564Ad3060c540`
Total Supply	1,000,000,000 THX
Decimals	18
Contract Status	Deployed and verified on BscScan
Initial Supply	The entire initial supply is held in the deployer wallet
DEX Pair	No DEX pair yet - the THX/BNB pair is created after the presale ends

Related Hero NFT

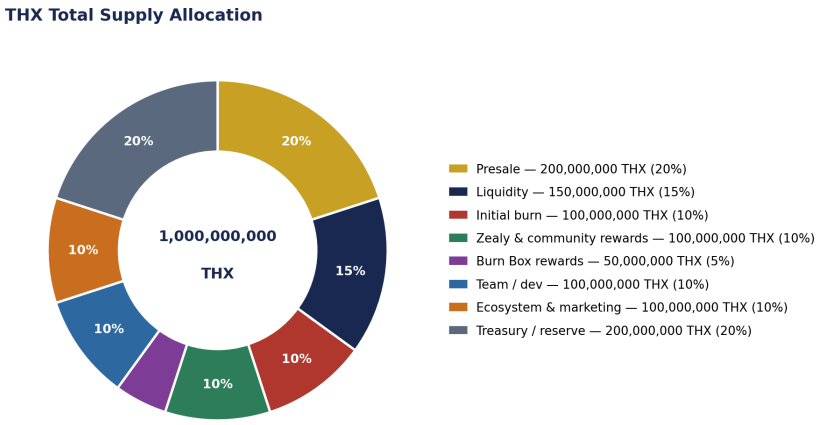

Specification	Details
Hero Contract Address	`0x6D862c8B847323961FCD349ffFbee0133F6B929A`
Maximum Supply	6,666 Hero NFTs
Free Mint	Maximum 2 per wallet
Marketplace	Element Market

Owning a Hero NFT is more than holding a collectible. In the THX presale, Hero NFT holders receive an 80% discount price, and that ownership is verified directly on-chain.

3. Tokenomics

The total supply of THX is 1,000,000,000 THX, divided into the following eight allocations. All percentages are calculated from that total supply.

Allocation	THX Amount	Share
Presale	200,000,000	20%
Liquidity	150,000,000	15%
Initial Burn	100,000,000	10%
Zealy & Community Rewards	100,000,000	10%
Burn Box Rewards	50,000,000	5%
Team / Dev	100,000,000	10%
Ecosystem & Marketing	100,000,000	10%
Treasury / Reserve	200,000,000	20%
Total	**1,000,000,000**	**100%**

The Burn Box Rewards allocation of 50,000,000 THX funds a reward of **5,000 THX for every Mystery Box burned**. The Zealy & Community Rewards allocation funds community campaigns, including the Zealy Season 1 prize pool of 24.5 million THX.

4. THX Presale

The presale sells an allocation of 200,000,000 THX for BNB. THX is sent directly to the buyer's wallet at the time of purchase.

Term	Details
Normal Price	1 BNB = 1,000,000 THX
Hero NFT Holder Price	80% discount: 1 BNB = 5,000,000 THX
Discount Purchase Cap	Maximum 50,000 THX per 1 Hero NFT held (in total, at the discount price)
Minimum Purchase	0.01 BNB
Maximum Purchase	5 BNB per transaction (normal price)
Presale Allocation	200,000,000 THX
Duration	14 days, or until the allocation sells out
Maximum Raise	200 BNB (if the entire allocation sells at the normal price)
Currency	BNB
THX Delivery	Sent directly to the buyer's wallet

How the Holder Discount Works

The 80% discount is checked on-chain: the wallet must hold at least 1 Hero NFT, i.e. `balanceOf` on the Hero contract is greater than 0. A qualifying wallet pays one fifth of the normal price, so 1 BNB buys 5,000,000 THX. The discount quota is 50,000 THX per 1 Hero NFT held at the time of purchase: 1 NFT = max 50,000 THX, 2 NFTs = max 100,000 THX, 6 NFTs = max 300,000 THX at the discount price. THX above the quota can still be bought at the normal price.

> **Unsold presale THX is burned** to the dead address `0x000000000000000000000000000000000000dEaD` at finalize.

5. Burn Mechanism

- **Initial burn:** 100,000,000 THX (10% of total supply) is burned at launch.
- **Unsold presale burn:** all unsold presale THX is burned to the dead address at finalize.
- **Further burns:** any further burns will be announced separately through the official channels.

Tokens sent to the dead address cannot be recovered and are permanently removed from circulation.

6. Liquidity and 1-Year Lock

After the presale ends, THX liquidity is created on PancakeSwap in the THX/BNB pair with the following composition:

- **60% of the BNB raised in the presale** is added as liquidity, paired with **150,000,000 THX** from the liquidity allocation.
- **LP tokens are locked for 1 year (365 days)** via PinkLock / Team Finance.
- **The remaining 40% of the BNB** is used for operations, development, and marketing.

> Proof of the liquidity lock (the lock link) will be published on the website https://thalvorix.xyz and on X https://x.com/THALVORIX, so anyone can check the lock period and the amount locked.

7. THX Utility

- **Game rewards:** rewards from Duel Arena Battle Card, division promotions, and Burn Box.
- **Zealy rewards:** community campaign rewards, including Season 1 at 24.5 million THX.
- **Burn Box:** every Mystery Box burned gives 5,000 THX.
- **In-game currency:** using THX as an in-game currency is a future development plan.
- **Governance:** voting rights for THX holders over ecosystem decisions are a future development plan.

8. Game Ecosystem

- **Duel Arena Battle Card:** a battle game that uses the player's own Hero NFTs as cards and characters.
- **Mystery Box:** a reward earned from victories and rank promotions in the game.
- **Burn Box:** Mystery Boxes can be burned to receive 5,000 THX per box.
- **Hero NFT Marketplace:** Hero NFTs are traded on Element Market.

9. Roadmap

Already Live

- Hero NFT (maximum 6,666, free mint maximum 2 per wallet)
- THX token (contract deployed and verified)
- Duel Arena Battle Card
- Mystery Box and Burn Box
- Zealy Season 1

Next

- THX presale for 14 days
- Listing on PancakeSwap and LP lock for 1 year
- THX utility inside the game
- Online PvP

10. Risks and Disclaimer

> This document is **not investment advice**. The team does not guarantee the price of THX or any profit, and token prices can fluctuate sharply. Do your own research before buying.

- **Shared ticker:** the THX ticker is also used by another project, THX Network on the Ethereum network. Always verify the contract address `0x4fCdA9835B50BDF454BA96a813d564Ad3060c540` before buying - a token with the same ticker but a different contract address is a different token.
- **Smart contract risk:** there is a risk of bugs in smart contracts, including the token, presale, and liquidity lock contracts.
- **Market risk:** prices can fluctuate and the value of a purchase can fall in part or in full.

Verification Checklist Before Buying

- The THX contract address matches exactly: `0x4fCdA9835B50BDF454BA96a813d564Ad3060c540`
- The network selected in the wallet is BNB Smart Chain (chain 56).
- For the discount price, the wallet holds at least 1 Hero NFT from contract `0x6D862c8B847323961FCD349ffFbee0133F6B929A`; the discount quota is 50,000 THX per Hero NFT held.
- The purchase amount is between 0.01 BNB and 5 BNB per transaction.

Presale Key Numbers

Item	Value
Presale allocation	200,000,000 THX
Normal price	1 BNB = 1,000,000 THX
NFT holder price (80% off)	1 BNB = 5,000,000 THX
Discount cap	50,000 THX per Hero NFT
Liquidity	60% BNB + 150,000,000 THX
LP lock	1 year (365 days)
